

# Air Traffic Control (ATC) AERODROME CONTROL

## Duration: 8 weeks

### Objectives

To provide students with the theory, principles and practice of aerodrome control. Students are given tuition and taught skill in excess of ICAO standards and recommended practices and to prepare them for validation training at an aerodrome control tower.

### Prerequisite

- ICAO 051 ATC Assistant, or equivalent course
- English Language upto IELTS 5.5

### Course Content

#### Theory

- Introduction (Int)
- Air Traffic Services (ATS)
- Communications (COM)
- Aerodrome Control (ADC)

#### Simulation Training

35 hours of simulation per student will be provided during the course including assessments and final examination.
